

FREE Lead Line Replacement

PWSA established a free lead line replacement program available to homeowners and tenants who meet certain income requirements.

The funding is expected to replace 200 privately-owned lead lines throughout PWSA’s drinking water service territory. If there is also a publicly-owned lead line serving the property, PWSA will replace it at no additional cost. Customers verified as meeting the income requirements can have their lead line replaced in a matter of one or two months.

People in Household	Annual Income Eligibility (300% of Federal Poverty Level)
1	\$38,280
2	\$51,720
3	\$65,160
4	\$78,600
5	\$92,040
6	\$105,480
7	\$118,920
8	\$132,360
For more than 8 people, add this amount for each additional person.	\$13,440

How to Participate

- Contact Dollar Energy Fund at 866-762-2348** and tell them you’re interested in the Lead Service Line Replacement Project. Tenants can also qualify for this program with the homeowner’s permission to do work on their property.
- Dollar Energy representatives will ask for verification of your income.** This will help them determine if you fall within the income guidelines.
- If you qualify, PWSA will review your service line material record to determine if you may have a lead line.** PWSA may also visit your home to inspect for lead.
- If lead is found, they will set up a time to come to your property and replace the line.** PWSA uses a trenchless method for over 95% of lead line replacements, which means there will be little to no disruption to your yard.
- A licensed plumber will complete a final inspection of the work.**
