

Job Announcement

Position: Laboratory Manager
Division: Water Quality and Compliance
Rate: To be determined

FLSA: Exempt
Posted: October 29, 2020
Application Deadline: until filled

Summary:

The Pittsburgh Water and Sewer Authority is seeking a candidate for the position of Laboratory Manager. Under the general direction of the Water Quality and Environmental Compliance Manager, the Laboratory Manager, leads, oversees, and coordinates the laboratory's staff and the implementation of the Laboratory's Quality Assurance Plan.

Duties:

- Maintains and updates the laboratory's Quality Assurance Plan (QAP)
- Coordinates activities required by the State of Pennsylvania Laboratory Accreditation Bureau, including preparing required documentation, submitting applications, and coordinating annual reviews and technical revisions to Standard Operating Procedures (SOPs).
- Reviews drafts of new and updated SOPs for conformance with state and federal EPA requirements; works with Water Quality/Environmental Compliance Manager and staff to resolve process and other issues applicable to SOPs.
- Monitors revisions and additions to certification and regulatory requirements for impacts on quality assurance/quality control (QA/QC) requirements.
- Develops and conducts new and refresher training sessions for laboratory staff on QA/QC standards, processes, data integrity, ethics and reporting requirements.
- Compiles existing and/or develops new QA/QC reports for management.
- Coordinates preparation for onsite audits by state certification officers.
- Monitors to the QA/QC procedures specified in the QAP and SOPs are being consistently applied.
- Conducts monthly spot checks of raw data generated in the laboratory and evaluates its accuracy in relationship to previous, simultaneous, and related data.
- Ensures that applicable quality control procedures have been followed based on analytical results.
- Reports any anomalies to Water Quality Manager and ensures that control and detection limits for processes are reviewed and modified as warranted.
- Conducts periodic audits and assessments of laboratory methods and processes down to a detailed level including instrumentation settings.
- Trace processes from sample collection to reporting to verify compliance with the laboratory QA manual, applicable SOPs and all certification and regulatory requirements.
- Manages laboratory records and data.
- Confers with QA/QC officers or related staff at contract laboratories when discrepancies or anomalies have been identified in reporting of their results; gains agreement and documents corrective action to resolve discrepancies.
- Arranges for and participates in annual proficiency testing.
- Maintains personnel files, including employee Performance Testing records and employee training records.
- Directs plant and field tests and special laboratory studies to support the treatment process.
- Reviews data and makes recommendations.
- Oversees or supports the sampling and reporting as needed for the Authority's NPDES and other permits.
- Oversees preventative maintenance and repair activities on the laboratory, plant, and field sampling equipment.
- Ensures the calibration of instrumentation and ensures compliance with regulatory requirements.
- Works with the Water Quality and Compliance Manager to develop annual budgets and arranges for the procurement to replace laboratory and field equipment as needed.
- Prepares the annual Consumer Confidence Report (CCR) for publication.
- Assists in the preparation and update of emergency response plans and procedures for the Authority's Emergency Response Plan.
- Investigates water quality concerns from customers.
- Prepares customer reports and briefings to the Certified Operator's Committee.
- Other duties as assigned.
