

# Hazelwood Water Main Replacement Project

## What is happening in your neighborhood?

- As part of its Capital Improvement Program, PWSA will replace six water mains in the Hazelwood neighborhood of the City of Pittsburgh.
- This area was selected for replacement due to the general age of the water mains and past main breaks.

## What can you expect?

- First, crews will install a new water main on the street. The old water main will remain in service during this time.
- When the new water main is installed, crews will work to replace all water service lines connected to the old main, including lead water service lines, with a non-lead material.
- When all infrastructure is installed, crews will restore the street and any impacted sidewalks.
- It is common for our crews to complete all needed work before we restore the street.

## Schedule

- Anticipated Construction Start: Late November, 2020
- Anticipated Construction Completion: Spring 2021

## Construction Impacts

- Crews will work Monday-Friday from 7:00 a.m. until 5:00 p.m.
- Water outages will be limited to 1-2 days of construction. We will notify you in advance of a water outage via robocall.
- Streets will be closed to local traffic during working hours and will be plated and re-opened at the end of the work day. It is recommended that those with driveways park outside of the construction area during working hours.

## Who should you contact at PWSA?

- Mora McLaughlin, Construction Communications Project Manager, at 412.689.4137 or at [mmclaughlin@pgh2o.com](mailto:mmclaughlin@pgh2o.com)
- Project updates will be available soon at [pgh2o.com/HazelwoodWaterMains](http://pgh2o.com/HazelwoodWaterMains)

Work is weather pending and subject to change.

## COVID-19 Safety Guidelines

PWSA and our contractors are following strict guidelines established by the United States Centers for Disease Control and Prevention (CDC) and the Pennsylvania Department of Health related to the pandemic. The following measures are to protect the health of our employees, contractors, and you, our customer. As long as it is recommended by the CDC and PA Department of Health, all our work will occur under the following guidelines:

- Workers will undergo health screenings as needed and will report any out-of-state travel to supervisors.
- All employees will maintain social distancing in the execution of their work, including when communicating with our customers.
- All employees will wear face masks during their work.
- All work surfaces our workers are in contact with will be sanitized prior to leaving the work site.
- All work sites will be provided with portable hand-wash facilities or hand sanitizer.

If a private lead service line is found at your home, we will replace the line with a non-lead material. This will require some contractors and a Lead Help Liaison to enter your home. If property entry must occur, our contractors and Lead Help staff will follow the guidelines above in addition to these measures:

- The Lead Help staff will reach out to you via phone call before a scheduled home visit and will ask you the same health screening questions we ask our workers. If there are any health concerns, we will reschedule the visit.
- Limit the number of people entering the home.
- Any necessary in-person discussions will occur at a safe distance or will take place outdoors, if possible.
- Questions regarding lead service line replacement work can be directed to our dedicated Lead Help Desk, at 412.255.8987 or at [LeadHelp@pgh2o.com](mailto:LeadHelp@pgh2o.com).
