

## Rain Barrel Credit Application

As of February 15, 2024, PWSA offers residential customers a one-time \$40 credit for an installed rain barrel of at least 50 gallons that captures and detains roof runoff on their property. One rain barrel per parcel will be allowed a credit. Customers must also submit a photo of the rain barrel installed (and identifiable to your address, e.g. a second photo may be needed showing the house/yard) and in good working order (rain barrel properly connected to collect roof stormwater, etc.).

Customers will be notified of approval of the rain barrel credit by email (or by phone if no email address is provided) and the credit will appear on the next PWSA bill. Customers will be notified within two weeks of submitting a rain barrel stormwater fee credit.
